

# NellyBoxes CIC

**Cost: £5000**

Project location: Auchenback  
Resource Centre  
Barrhead

Project name:

**Boggin Babies**

What is your project?

We aim to run a low cost, affordable baby and toddler group with a clear focus on messy play and sensory activities. We have a child care qualification and understand the importance sensory play has on the holistic development of a child. It's also especially important to us that we ensure our activities are fully inclusive and aim to support those with ASN.

As the cost of living increases, we don't believe families finances should impact the opportunities that are available to babies and young children. We also want to provide a warm space for families/parents and carers where they can come together in the community to reduce social isolation.

Who is the project for?

Children - By providing them with fully inclusive play experiences that enrich and enhance their holistic development, with a keen focus on sensory play.

Parents/Carers - By providing a warm, welcoming setting where people can come together and become part of the local community.
